Prior to any professional skin resurfacing treatment (macrodermabrasion or chemical peel) the use of medical grade skincare products with active beta or alpha hydroxy acids is required for 2 weeks to ensure great results and reduce the risk of any complications. Please talk with a staff member to find which products will be suitable for your skin type before booking your facial service.

Salt-A-Peel Macrodermabrasion ~ Single Treatment \$110 ~ Series of 3 \$275 ~ Our most popular spa treatment! Three times stronger than *microdermabrasion* and using only natural sea salt, Salt-A-Peel Macrodermabrasion aggressively buffs off old skin cells that cause your skin to look dull and leaves you with glowing, healthy looking skin. This treatment also includes application of a vitamin-rich anti-aging masque using a specially-designed facial ultrasound machine. Sound waves gently drive the vitamins and anti-oxidants deep into your skin for an overall rejuvenating effect. For best results and maintenance, let us book your appointment every four weeks. Not recommended for ethnic skin or any client using skin peeling products (retin-A, retinol). ***For advanced clients, add a chemical peel treatment for just \$25*
